PROFESSIONAL SUMMARY

Senior mobile engineer with 8+ years shipping security-sensitive products across native Android and cross-platform stacks: an AI-driven identity verification (IDV) SDK with NFC chip reading and OCR document capture, a merchant payment SDK with encrypted transaction processing, zero-trust network access (ZTNA) apps and a no-logs VPN client. Ships production Kotlin Multiplatform, Flutter and React Native alongside Kotlin / Jetpack Compose. Applies biometric authentication, Google Play Integrity API checks and encrypted storage on MVVM / Clean Architecture codebases; integrates Stripe, PayPal, Google Pay and Apple Pay. Led Agile teams of 10+ developers, cutting crash rates by 30% and delivery timelines by 25%.

CORE SKILLS

Android and Kotlin: Kotlin, Java, Android SDK and Jetpack Components, Jetpack Compose, Multithreading with Coroutines and Flow, Dependency Injection (Hilt), Room, DataStore, SQLite

Cross-Platform: Kotlin Multiplatform (KMP) - production release, Flutter (Dart) - BLoC / Cubit, Riverpod, Provider, GetX state management, React Native, Shared business logic and networking across iOS and Android

Mobile Security: Biometric Authentication (fingerprint / face), Google Play Integrity API (app and device integrity checks), Encrypted Data Storage (SQLCipher, EncryptedSharedPreferences), ProGuard / R8 (code shrinking and obfuscation)

Payments and Networking: Payment gateways and digital wallets (Stripe, PayPal, Google Pay, Apple Pay), Google Play In-App Billing, RESTful APIs (Retrofit, OkHttp), WebSockets, Push Notifications (Firebase Cloud Messaging)

Architecture and Quality: MVVM, MVI, Clean Architecture, Modularization, SOLID principles and design patterns, Unit and UI Testing (JUnit, Mockito, Espresso, UI Automator), Continuous Integration / Continuous Deployment (CI/CD) with automated testing pipelines, AI-assisted development (Cursor, Windsurf, Claude, ChatGPT), Code Review, Static Code Analysis, Git / GitHub

Performance, ML and Leadership: Performance Optimization (Android Profiler, Macrobenchmark, LeakCanary, Firebase Performance Monitoring, Crashlytics), Firebase Analytics, Google Analytics, A/B Testing, Remote Config, Machine Learning (ML Kit, TensorFlow Lite), Agile / Scrum, Team leadership and mentoring junior developers

PROFESSIONAL EXPERIENCE

Senior Mobile Developer - InvoZone Pvt. Ltd., Lahore, Pakistan

May 2020 - Present

- Built Overify, an AI-driven identity verification (IDV) SDK combining NFC chip reading with OCR document capture.
- Delivered RevBits ZTN and RevBits CIP, cybersecurity apps providing zero-trust network access (ZTNA), and STAYPRI VPN, a VPN client with strong encryption and a no-logs policy.
- Implemented secure payment gateway and digital wallet integrations (Stripe, PayPal, Google Pay, Apple Pay) and biometric authentication (fingerprint / face); shipped MintRoute, an e-voucher and gaming card sales app with real-time verification.
- Architected and optimized high-performance Android and iOS applications, improving app efficiency by 40% and reducing crash rates by 30%; profiled performance, debugging and battery efficiency with Android Profiler, LeakCanary and Firebase Performance Monitoring.
- Led cross-functional Agile teams of 10+ developers, accelerating project delivery timelines by 25% while maintaining 98%+ code quality standards; reviewed pull requests and mentored junior developers.
- Developed Android apps in Kotlin with Jetpack Compose, Coroutines and Flow on MVVM / MVI / Clean Architecture with Hilt dependency injection, backed by unit and UI tests (JUnit, Mockito, Espresso) and CI/CD pipelines.
- Shipped cross-platform products with Kotlin Multiplatform (production release), Flutter (Dart) using BLoC / Cubit, Riverpod, Provider and GetX state management, and React Native, sharing business logic and networking across iOS and Android.
- Integrated RESTful APIs (Retrofit, OkHttp) and WebSockets with Room, Realm, SQLite and Firebase data layers; implemented AI-driven features (ML Kit, TensorFlow Lite) and tracked analytics with Firebase Analytics, Google Analytics and A/B testing.
- Additional projects: WBRZ Local News, Drive Safe (Mapbox), Quickxi Food, Easymove, BP Better, InvoChat, Mondia Group (Spring Boot reporting migration).

Android Developer - ElementaryLogics, Pakistan

Jul 2019 - Apr 2020

- Developed Android applications in Kotlin using MVVM architecture (LiveData, Room, Hilt dependency injection).
- Integrated third-party APIs, payment gateways and push notifications; participated in sprint planning, code reviews and client requirement gathering.

Android Developer - Astute Solutions, Pakistan

Apr 2017 - Jun 2019

- Built STS PayOne SDK, a secure payment SDK for merchant transactions with encryption and secure transaction processing.

- Designed and developed Android applications from concept to deployment, including Key Car Rental (car booking and rental services), using SQLite, Firebase, Google Maps and MVC architecture.

EDUCATION

Bachelor of Science in Computer Science - University of Lahore, Lahore, Pakistan

2012 - 2016

CERTIFICATIONS

Android Application Development (EVS) • Flutter Development Bootcamp • Java Web Services and REST API with Spring Boot (Udemy)
