

Mobile App Portfolio Overview

Cross-platform product delivery, app types, skills and selected work

This portfolio showcases overall product delivery skills, correct app-to-image mapping where assets are available, and text-based case studies where screenshots cannot be shared.

We handle both Android and iOS product delivery depending on project needs.

Overall Skills and Delivery Coverage

This document is not limited to Android-only positioning. It presents cross-platform mobile product delivery and selected backend support work where relevant.

Project Types

- Identity verification and scanner apps
- Cybersecurity and zero-trust products
- VPN and privacy apps
- Media, podcast and local news apps
- On-demand moving and delivery apps
- Travel and car rental products
- Navigation and route safety apps
- Retail top-up and gift-card platforms
- Enterprise and internal business apps
- Food delivery, collaboration and EdTech apps

Core Skills

- Cross-platform product delivery
- Requirement gathering and stakeholder communication
- Authentication and security workflows
- OCR, NFC and scanner-based verification
- Push notifications and login approvals
- Mapping, location and route handling
- Payments, top-ups and merchant tools
- Localization and Arabic-support delivery
- Real-time operations, chat and service flows
- Backend modernization support

Technology and Delivery Stack

Mobile: Kotlin, Java, MVVM, MVC, LiveData, Hilt, Firebase
Verification: OCR, MRZ / VIZ reading, NFC chip reading, facial matching, liveness checks
Security: biometrics, OTP, SMS, YubiKey, NFC U2F, approval-based login
Maps / Routing: Google Maps, Google Location Services, Mapbox
Commerce: payment gateways, e-vouchers, top-up flows, merchant utilities
Hardware / Device: Bluetooth thermal printer integration, biometrics, QR scanning
Backend support: Java Spring Boot endpoint migration and reporting services

Selected Product Coverage

Overify - Identity Verification

Identity Verification / Scanner • Mobile platforms handled for product delivery

OVERify is an advanced identity verification app built by Nashid that simplifies and secures identity verification using artificial intelligence, NFC, OCR, MRZ reading, VIZ reading, passive and active liveness checks, and facial matching. It is designed to deliver a seamless scanner-based verification experience for modern digital onboarding.

WBRZ Local News

Media / News / TV • Mobile platforms handled for product delivery

WBRZ News provides late-breaking local news, weather, traffic, and sports for South Louisiana. The app includes live and 24-hour HD news delivery, trusted local reporting, strong visual storytelling, and coverage powered by the WBRZ News 2 team.

STAYPRI VPN

Cybersecurity / VPN • Android and iOS capable product delivery

STAYPRI VPN protects online activity with AES-256-GCM encryption and a strict no-log policy. It is designed for office access, public WiFi protection, and reliable privacy with fast and secure VPN connectivity.

Podcast Player & Podcast App

Media / Audio • Mobile app delivery

An ad-free podcast app with interactive features, smooth navigation, strong compatibility with major podcasts, and episode reminders to help users never miss new content. The product focuses on clean playback experience and user-friendly discovery.

MintRoute - Gift Card Supplier

Retail / E-vouchers / Top-up • Mobile product delivery

This app helps retailers sell e-vouchers and gaming cards through on-demand top-up delivery. It supports product discovery, direct top-ups, real-time verification, personalized discounts, and nearby thermal printer receipt printing for merchant operations.

Mondia Group - Reporting Services

Backend / Java Spring Boot • Backend services supporting digital products

Worked with the Mondia team on reporting services, migrating endpoints from legacy technologies to modern Java Spring Boot solutions. The work improved performance, maintainability, scalability, and service security for a critical business module.

Drive Safe

Navigation / Safety • Mobile app delivery

Drive Safe is built to improve safety on the road with Mapbox-based navigation, real-time traffic updates, and optimal route suggestions. The app focuses on practical route guidance and secure driving support.

More Product Experience

Quickxi Food

Food Delivery • Mobile app delivery

A food ordering app built to deliver dishes quickly with a smooth and user-friendly mobile ordering experience. Users can place orders from anywhere and receive food conveniently at their doorstep.

EasyMove

Moving / Delivery / On-Demand • Android and iOS product handled

Easymove is a moving and delivery app for apartment moving, furniture delivery, and on-demand logistics. It connects users with local helpers and trucks, supports flat-cost negotiation, and simplifies same-day moving and delivery tasks.

EasyMove - Messaging and Payments

On-Demand / Operations • Android and iOS product handled

This part of Easymove showcases service operations including chat, order coordination, payment methods, and request lifecycle handling across customer and operational screens.

RevBits CIP

Cybersecurity / Analytics • Mobile platforms handled for product delivery

A zero-trust cybersecurity solution that supports domain-based administration and analytics-rich dashboards. The product visualizes PAM login stats, recent exploits, iOS searches, reported incidents, top attacker IPs, email security metrics, and related operational intelligence.

BP Better

Enterprise / Internal Business App • Android and iOS versions handled

BP Better helps BP businesses and stations stay informed with notifications, weekly franchise communications, calendars, promotional assets, offer details, training materials, and business updates through a customized mobile experience.

RevBits ZTN

Cybersecurity / Zero Trust Network • Mobile platforms handled for product delivery

A zero-trust network access product where users manage their domain-based network and admins manage users and activity. The product supports secure registration, login, admin-controlled authentication enforcement, web login approvals, QR-based login, biometrics, OTP, SMS, YubiKey, and NFC U2F workflows.

7Speaking

EdTech / Language Learning • Mobile app delivery

7Speaking supports language learning across English, German, Spanish, French, and Italian, with microlearning, social learning, group lessons, elearning, video chat, and personalized activities based on user level and professional needs.

InvoChat
